Local medical imaging modernization

A development gateway from legacy DICOM to a browser viewer.

Live worklist showing synthetic studies from the local archive.

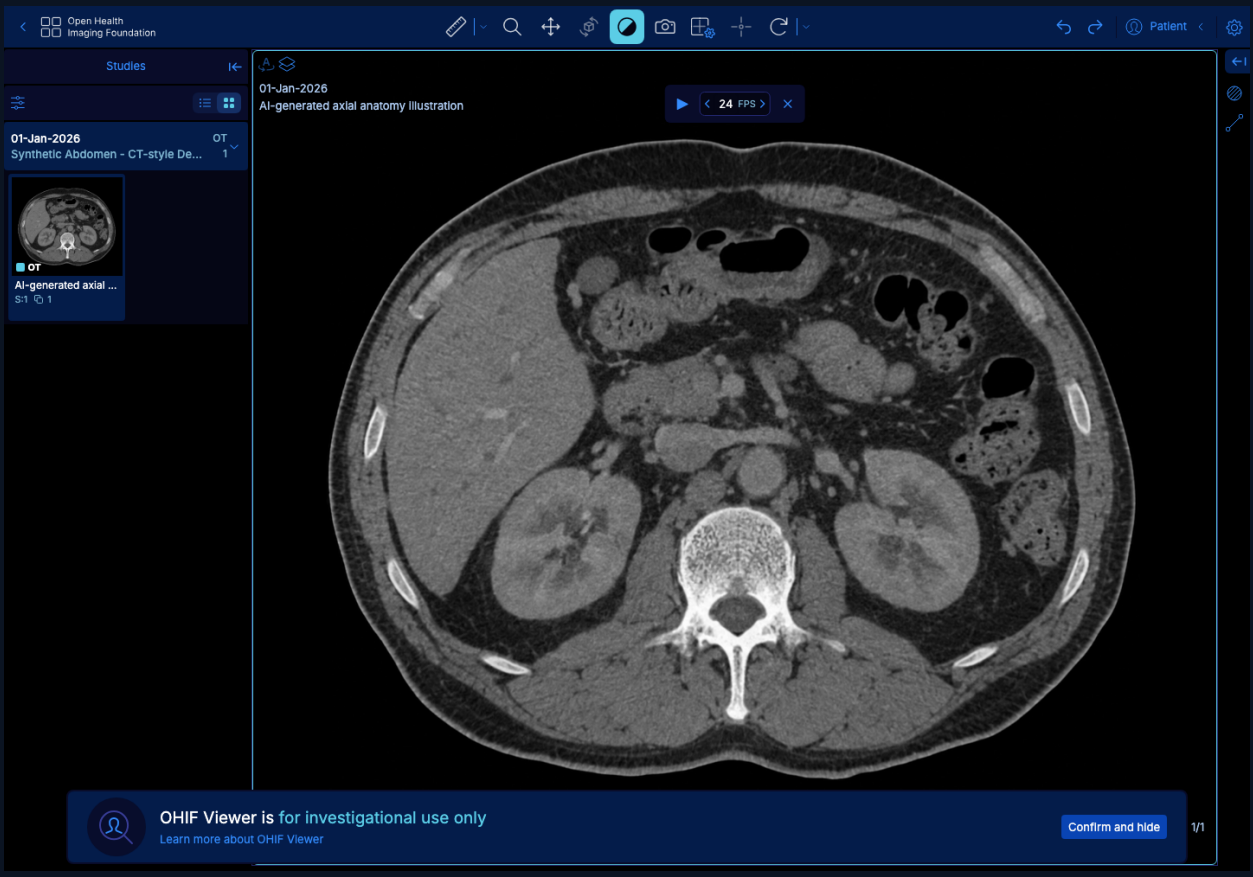

DICOM C-STORE > ORTHANC > DICOMWEB > OHIF

Find studies by description, patient ID, or UID. Filter by modality and open the selected study in OHIF from the same worklist.

Apple silicon macOS / Docker Desktop / Loopback services

Verified workflows

Legacy ingestion, standards-based retrieval, and stack viewing

OHIF displaying an AI-generated axial abdomen illustration.

2048 x 2048
Synthetic slice size

123.63 ms
Median local retrieval

98.4%
Smaller RLE response

Retrieval timing is the median of three localhost WADO-RS requests. RLE savings apply to this synthetic pattern. OHIF frame encoding for the RLE study remains unconfirmed.

Development use only. Synthetic or properly de-identified DICOM only.
