From legacy DICOM to browser viewing

A local medical imaging gateway for Apple silicon.

THE WORKFLOW

DICOM C-STORE

Send a synthetic study.

ORTHANC

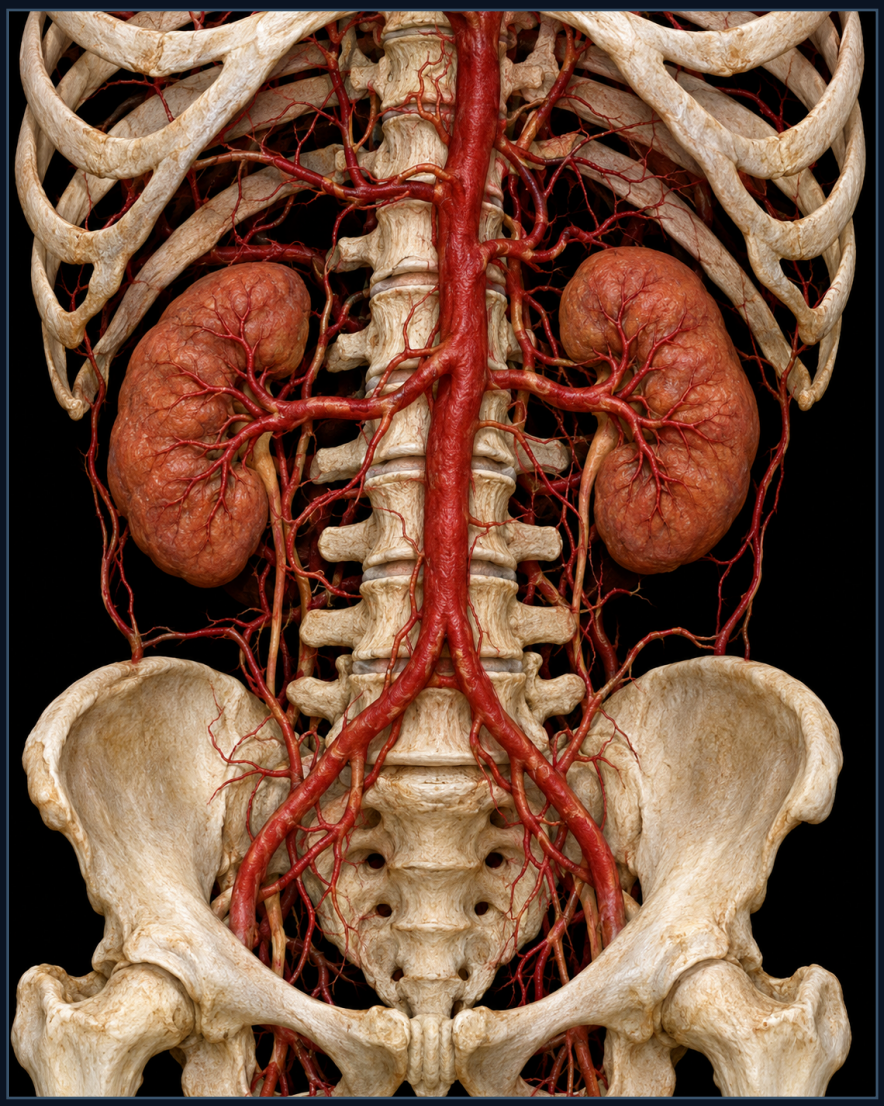

Store and index the study.

DICOMWEB

Query and retrieve images.

OHIF VIEWER

Open studies in the browser.

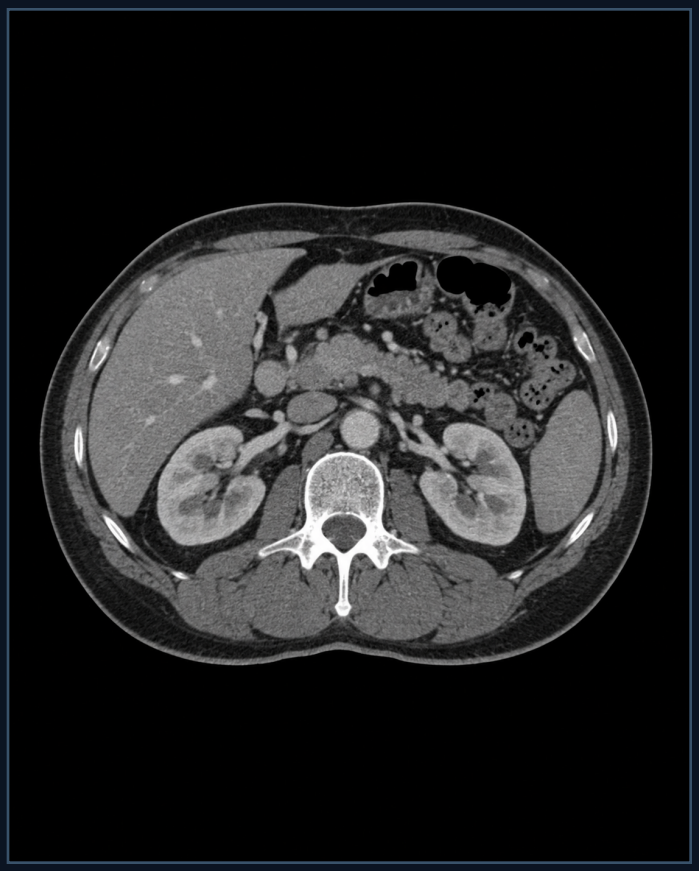

01 / Simulated color volume rendering

The worklist connects archive search, modality filters, and direct OHIF links.

Gallery images are AI-generated illustrations of imaging views.

Two views of anatomy

Grayscale CT-style illustrations

02 / Axial abdomen

03 / Sagittal lumbar spine

VERIFIED PROTOTYPE RESULTS

2048 x 2048	123.63 ms	98.4%
Synthetic slice size	Median local retrieval	Smaller RLE response

Timing is the median of three localhost WADO-RS requests.
RLE savings apply to the synthetic benchmark fixture.

The gallery is separate from the prototype's measured test fixtures.
